

# Accessories

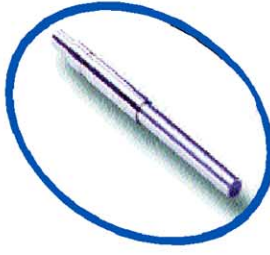

Single Core Quartz Rigid Light Pipe

The quartz accessories we offer are of superior quality. Useful for deep UV & high intensity applications.

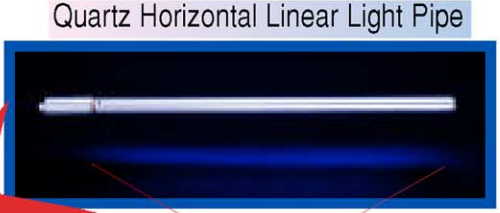

Quartz Bifurcated LightGuide

Fiber Optic Rigid Light Pipe

The fiber optic light pipe is a great tool for spot area curing requirements.

**The UV curing systems are dedicated systems for spot and small area curing applications. The accessories offered have been developed in the interest of customer demands. We understand that not all UV curing applications are the same, and we have been successful in offering diverse tools which solve small area curing problems.**

Quartz Horizontal Linear Light Pipe

Linear UV Energy

Used for horizontal scanning and edge curing.

Small Area High Uniformity Exposure Lenses

The exposure lenses are available from 1" x 1" up to 4" x 4". Ideal for small square area curing where high uniformity is required.

Quadfurcated Fiber Optic UV Light Guide

Custom multi branch light guides available, up to 6 tip and varied overall lengths.
